I am using your NightRegulator bot 3.4, and I want to add some plugins, like music rotation (or it is a script can also be). But when I press load plugins it says there are no plugins selected. How can I make it read the plugins?

Please use the private messaging feature of this forum  
  
next time darksnipa.

why was it locked? it was genuine support

no need to add a music plugin, enable BETA updates on NR Settings and itll auto-update you to the 3.5 BETA that has music included

That doesn't change the fact that others may have the same question.

Nightma is the creator of nightregulator it says at the top of the screen. So why would I PM him if other people have the same questions. And it's not a personal question, but a public one. The message title is just to tell the person that I need his help.
