I just starting to play a game of Renegade a few minutes ago and a few seconds after it finished loading and was actually in the game, it crashed and renguard gave me this message:

[14:47] Trying to connect to server #1...Connected

[14:47] Secure link established.

[14:47] Welcome to RenGuard , Skyline!

[14:47] To launch Renegade, please click 'Renegade'.

[14:47] WARNING: Model Textures (Skins) have been detected on your client! You will not be able to join a pure server.

[14:48] You have joined UNRULES.COM - New Maps.

[14:48] Bad/Corrupted file game.exe has been found in your renegade directory

[14:48] You have been kicked from the server for cheating.

[14:48] Disconnected from RenGuard network

I just played ren last night and it was working just fine. This won't result in a ban will it? I'm the only one that uses this computer and I made no changes to renegade or installed any programs.

Thanks for the help.

Edit: Tried joining again... worked fine...

Yeah, just wait until the page in the windows finishes loading before pressing the Renegade button to load up Renegade.
