RENEGADE UNDERGROUND
www.renunderground.com

Renegade Underground is a new server community which has been in development for the last couple of weeks and was used exclusively for the latest UNRELEASED Night Regulator betas. The FDS has been up and running for each of the servers for about 2 weeks now and is stable enough to be announced to the community.

Renegade Underground features the following public servers:
--RenUnderground :: AoW (a0000000e) 48 players (8 reserved slots)
--RenUnderground :: CTF (a0000000L) 16 players (4 reserved slots)
--RenUnderground :: Sniper (a0000000g) 28 players (8 reserved slots)
--RenUnderground :: Fan Maps (a0000000p) 32 players (8 reserved slots)

Each of these servers are running unreleased private builds of [NR] and has many custom features installed. The game servers are sponsored by All Out Hosting and the Tsunami Alliance gaming community.

Moderator applications will be open, but selective, for the next 9 days. If you are interested, please apply on the RenUnderground forum.

RenUnderground commands a very strict policy against cheating and is very community-oriented. Convicted cheaters on other servers may be banned on our servers, and anyone found cheating on any of our servers will find themselves banned on ALL of our servers ... permanantely.

Being a free community server, it is our hope that you will enjoy the server and contribute to its development by letting us know what features you would like added, removed, or changed. You can do this in the forums at any time.
