Your name matchs a cheater I banned in two of my servers, shame we cant just delete you outta life as we can with your posts.

If any server admin/mod would like the cheaters ip, its below.

Nick(s) that matched for IP AntiCheat : 216.40.74.133

hmmmmm i think u make a mistake

this is not my ip...(i got a isp which make a presentiv connection)
i only use this name atm normaly i use my real nic name ([_DBW_]_Pyro)

i dont know ur server but atm iam not banned from any server (i only got kicked for snipeing from a german server 2-3 times))

i only found a web side with a lot of cheats and other stuff which i wanna report and my reporting post got deleted for no resone
(rg bypass, rg fake client, iam bot, unbann, radar hack etc etc etc...)

ps: sry for my bad english iam german and i try to getting better english

and if u post a ip from other guys u can be geting fu**ed from the police for that (sry i duno enoth english for saying this better).

in germany the cheater (which his ip was) can sue u for that so pm the other server owner with the ip if u wanna that he getting banned on all server

MFG DBW Pyro

pps:

216.40.X.X falls in following ip range:

NetRange: 216.40.64.0 - 216.40.95.255
rgName: OPENBAND MULTIMEDIA, LLC
OrgID: OML-12
Address: 14927 Bogle Drive
City: Chantilly
StateProv: VA
PostalCode: 20151
Country: US

host name identifikation:

*res.openband.net

....

my isp host name identifikation:

*hsi.kabelbw.de

....

iam in germany like u can see on my provider, and the ip u posted is from a us provider.

its funny this isp has only ca. 8000 ips it must be a little provider or this provider has multiple ip range registrations. if i get more time and desire for that, i can isolate more and more but i dont have desire for this no more

and bans only help vs noobs, if u knwo what the system makes its easy to unbann a normal

server bann, u can unbann u from rg too if u knwo what to do ;-D the normal rene key can be getting more than 1 hash ^^ but i dont tell now all the little cheater f***er what they have to do

I believe him. The other "AntiCheat" joined Black-Cell as well with the same IP IWarriors provided, which is in Virginia, not Germany. That IP is also shared with another nickname, "Sidonuke4". See if that guy has joined your server as well. Anyway, if you're reporting a cheat site, I'd suggest doing it in a private message to a moderator/admin, because otherwise it allows dishonest people to see it and possibly get cheats from there. They probably already know most of the active ones out there, though.

It is not smart to post a link to a cheating site publically.

If you really feel the urge to let us know, then PM it to Crimson but be aware that she (and many others) probably already know about it.

i already pm crism and aircraftkiller 3-4 days ago. but i dont get a answere so i postet only and scrennshot from the fake client where all url was covered with red so nobody can find it easy

i dont got any messenges from mods or admins so i posted now this therd

edit: there was no links puplik to see, are all covered with red...
iam not a cheater fan

It doesn't matter that the link to the site was covered, what matters is that you showed what the cheat was called.

Most people with a braincell know what the cheat is anyway.

BUt it seems you need more braincells to know how to test for it.

I didn't bother to reply because I heard of that particular cheat site a couple of years ago. Thanks for looking out for us.
