hello all...

i have a problem with my renstat on my win2003 web edition root, a new install of renstat not fixed the problem
the problem is

run time error "713"

class is not registered

it becomes after an object with the following CLSID
 00000010-0000-0010-8000-00AA006D2EA4

Did You try Readme.txt ?

I'm pretty sure noone has ran into that problem and anyone who has pacific details on how to fix it isnt in the interweb anymore, So it seems..

You could always use brenbots rank plugin instead... renstat has always been a PITA to get working from what I remember
