Hey everyone, this question had probally been answered before.

Ok im getting a server and i want to put the ss inf mod on it but i cant find the inf mod anywhere. I can find ssaow but no sites with the ss inf mod anywhere. Does anyone please know where i can find and download it.

Thanks

You set SSAOW1.5 or 1.6 to Inf only mode, basicly AGT aand Oblisk don't work, same as WF and Strip.

All you would need to do is edit the maps. =]

Why do you need to edit the maps?

Level edit?

Something what he has.

What?

I am asking why he would have to edit the map when you are suggesting to use inf mode from ssaow.

I am perfectly aware of what level edit is!

Because bgkill is a mod at our server, He asked for some help some time ago with making a map, Tho I can't make a map, I told him to post on the mod forum here, Knowing that quite a few people know what there talking about and would like to help out.

He must have thought that there was some Special Inf mod, But SSAOW covers it all.

The reason I mentioned Level edit is because were getting a Inf only server soon (Tho I highly recommended Counter Strike Source server) The users Voted and Inf only won. So we choose bgkill007 to mod the map's out, All you need is level edit, right?
