I'm selling this calculator because I don't need it anymore, so if anyone needs a good calculator for cheap, check this out.

does it do Binary math? I was planning to get a calculator which has binary functions for my Principles of Computers module at university.

EDIT: nvm, US shipping only

Only if you live in America.

TI calculators are soooo not worth the money you're putting on them.

I think you misunderstood him. I think he's saying a new TI calculator is a total rip-off.

I love my calculator like a son. I use it so much and have gotten so much out of it. My originally square buttons are round now from use. There is no better investment if you enjoy math and sciences.
