I'm also having this problem, but I simply stopped caring about it.

Doesn't anybody here use Night Regulator?

Edit: When do you think that the final role play map will be released?

The FDS directory that NR (by default) uses does not contain server.dat and therefore cannot run the server. You need to select the correct directory which contains the server. Simple if you put your mind to it.

Also, take any other question about NR to www.aohost.co.uk.

Thanks I think that I have taken care of that problem, I simply installed a Renegade FDS. I'm guessing that FDS stands for Free Dedicated Server?

Can anybody please tell me how to make the !sounds command?

Well being as you said "!Sounds" command, I am assuming that you are talking about a command in the team chat message box. You would need to be able to do some C++ scripting, and have the programs on:

http://www.renegadewiki.com/index.php?title=How_to_compile_the_scripts.dll

Then if you look at the source code for AOW, you could do some copying and pasting, and then some modifying and you could set it up your self, to do exactly what you wanted it to do.

!sounds are incorporated in BrenBot or custom scripts.

Ask Nightma12 if you want them in NR, on their forums.

NOOOOOOO! The link doesn't work!

Edit: Its ok I found it.

Merovingian wrote on Tue, 12 December 2006 15:26!sounds are incorporated in BrenBot or custom scripts.

Ask Nightma12 if you want them in NR, on their forums.

Thanks I will do that.

Why does it say: "No Initial Level File Selected?"?

Check over SSAOW.ini for the level file, make sure there's at least one map in the file, with correct settings.

Don't edit something if you don't understand how it works.

Do you know where I input the map rotation in SSAOW? I tried copying and pasting it to the end of the file, but I don't think that it worked.

Re-install SSAOW
