You need to first install patch 1.037 available here: <ftp://ftp.westwood.com/pub/renegade/updates/>

what does it do ?

and there should be more servers cause they hardly ever do any other maps than all the original maps its so repetative

skaren wrote on Wed, 20 December 2006 22:08 what does it do ?

and there should be more servers cause they hardly ever do any other maps than all the original maps its so repetative You need to run the patch, you'll then have the same version as everyone else.

And on WOL there currently are about 100 servers. Don't forget u can also scroll down the list.
