Hi,

Does anyone got C&C Renegade workin' on Windows Vista (RTM, build 6000)?

It ain't workin' for me . Does anyone know how to fix it?

And when does RenGuard 1.04 comes . It's almost one year after the first beta ..

Try running renegade in windows XP compatibility mode. It should work anyway.

Well, it doesn't work for me. I tried "Windows XP (Service Pack 2)" and "Windows 2000" compatibility mode. Still ain't workin'.

Can't test it here, still waiting for ATI to release some drivers which don't code-43 on startup....
