You got the Unable to connect problem like I do.
Unfourtunately nothing I have followed here works. I have re-installed renguard over and over
again, Re-installed renegade a few times, dissconncected my xfire, turn off my Anti-Virus
programs, and even re-installed my operating system. I just get this problem.

Trying To Connect to server 1 ... Failed
Trying To Connect to server 2 ... Failed
Trying To Connect to server 3 ... Failed
Trying To Connect to server 4 ... Failed
Trying To Connect to server 5 ... Failed
Trying To Connect to server 6 ... Failed
Trying To Connect to server 7 ... Failed
Trying To Connect to server 8 ... Failed
Trying To Connect to server 9 ... Failed
Trying To Connect to server 10 ... Failed
Trying To Connect to server 11 ... Failed
Trying To Connect to server 12 ... Failed
Trying To Connect to server 13 ... Failed
Trying To Connect to server 14 ... Failed
Trying To Connect to server 15 ... Failed
Trying To Connect to server 16 ... Failed

And so on...

It keeps doing this until renguard eventually crashes.
I really need help with this. Any other suggestions?

I bet you didnt cheak your firewall, And if you don't use a firewall, Cheak windows firewall, It's very
sneaky.

IVE HAD THAT PROBLEM BEFORE AND WHAT I DID IS I REFRESHEDE MY COMPUTER TO
THE TIME JUST BEFORE IT HAPPENED AND IT NEVER DID THAT AGAIN THOUGH YOU
MAY NEED TO REINSTALL A COUPLE STUFF.

Its an annoying thing really. But I havent played renegade in about 6 months now, and Im getting back into it. I got my connection problem fixed, but My new Windows Vista isnt working with gamespy or the renegade internet game options, so until I just recently found out that I can copy the ip address of the servers I want to get in to, I havent been able to play renegade. But, now I have a list of about 30 servers that usually have a good amount of players in them, so I guess I can enjoy it now.

BTW:I had my windows firewall turned off, so that wasnt the case.
