Hi

I am wondering if there will ever be support for a changing the mine limit temporarily (for the duration of the map) while in game using a moderator command? Or if there is support for this already, which reg. bot has it?

Also, is there a list of commonly banned users/known cheaters that is available?

Thanks,
~m.

BI-bot has it but it's not released to the public due to it not being done anyway.

Don't think BR, NR or CS have it.

About the cheaters: there's just too much, but you could ask a server owner that you trust to give you his server.dat which contains all bans (but also all rec's, ...). You can edit that .dat-file with a sqlite editor (e.g. to only keep the bans).

CS also supports changing the minelimit on-the-fly:
[06:08:47] <@HTT-Bird> !mset 35
[06:08:47] <@gz0ne3> Host: (CloudyServ): Mine limit has been set to 35.

Goztow wrote on Thu, 04 January 2007 03:28Why didn't I think of that .

 Or what HTT Bird wrote.

Every Bot supports changeing the Mlimit.

EDIT: nice sig.

U don't need to register to read. We're fully against that cheap-ass advertising technique.

Oh I know.

But I like you and you're server.
