ok i'm new here but 've alot time playing CC renegade.
i wrote i whole story of this problem at N00less homepage.

i have ADSL at home
and Cable conecction on my friend house.

ADSL 512 Prodigy Router 2WIRE HG1700 (Default config)
CableModem Megared 2.5mbps (Noting to configure its just a modem) Motorola SB5101

Pc Specifications.
P4ht 3.0
2x 512 ramd pc400
Ati9550 xt (Oc'ed)
WinXp Pro sp2

ok thats my machine and i play at home with ADSL and i CAN run Renguard without problems
everythings its fine.

My friend have 2 computer but i use my Computer to play on my Friends house and RG cant be
runned.!!!!

OMG its the same Machine and dun work on CABLE.

i think its my friends PC, but when i use My pc on my friend's house i cant use it. So its no the PC.
its the cableType connection.

Server emulation to "Bypass" Rg problem? or... whats the solution for this.

i have NO firewall No antivirus NO other PC tools. just Winxp and Renegade [i'm on vacations
thats why].

Is it the same problem as described here:
http://www.renegadeforums.com/index.php?t=msg&th=22107&start=0&rid=4 882 ?

yeah lol but in that thread Creed sent him away with the words:

Kpoch you should start your own topic. This topic is about something different.

From how I figured it sounded like a different error but I could be wrong.

If he can be helped by the fix then so much the merrier.
