Well im having a problem banning someone now... i thought i figured out the ban list and how to ban someone, but I mustn't be doing it right....

Well there is a guy logging into my servers with no name. i have come to a conclusion that he has names like mrkillz37, or riche*** and i matched his ip with a lot of other servers that have banned him... i tried putting his ip in the ban list, but dont know if im doing this wrong.

Id appreciate any advice on how to get this n00b out, as he is hacking and making the game terrible for other users... there fore making them leave. please help

blank player name is odd.

I see my server refuse those player names but I am running the Nickname Exploit fix.

[http://www.baddog-gaming.com/renegade/RenegadeFDS/FDS_Patches/nicknameExploitFix .zip](http://www.baddog-gaming.com/renegade/RenegadeFDS/FDS_Patches/nicknameExploitFix.zip)

You can try it.

If you're only on WOL, make a file wolbanlist.txt and place it in your renegadefds/ directory. Add the name and ip like this

nickname:1.2.3.4

nickname2:1.2.3.4

replacing the nick and sample ip by the real ip/nick.

You can use * as nick if u only know the ip or 0.0.0.0 as ip if u only know the nick.
