He doesn't natively speak english, he's dutch. If you take like 5 extra seconds to read it's understandable.

[View Forum Message](#) <> [Reply to Message](#)

I've seen the text document he's got and basically it will listen for "!build turret" and build the turret where the player is. Unfortunately, my knowledge in C++ is insufficient to help him.

surely the person who made the scripts will have released it as a plain .dll file? He has obviously got the source code instead of the actual scripts somehow...

well i do not know how to contact kamuix as i have never spoke to him i got this mod from cdcyborg and he doesnt know whot to do with it right now im asking nightma12 to help me hopefully he can help here is the text mod
i got

```
        else if (stricmp(Msg2,"!Build Turret") == 0) {
Vector3 spawn_position;
float cost = 600.0f;
char message[256];
t = 0;
GameObject *obj = Get_GameObj(ID);
if (Get_Object_Type(obj) == 0) {
    if (cost <= Get_Money(ID)) {
        Vector3 Pos = Commands->Get_Position(obj);
Pos.Z += 0;
        Commands->Disable_Physical_Collisions(Commands->Create_Object("Nod_Turret_MP_Improved",Pos));
        Commands->Give_Money(obj,cost*-1.0f,false);
//Commands->Apply_Damage(obj,99999,"Death",false); //Was this here to stop the player from
getting stuck in the guard tower? disabling collisions on the guard tower is a better solution.
        sprintf(message,"msg [KB] Player %s Has deployed a Nod
Turret",Get_Player_Name_By_ID(ID));
        Console_Input(message);
    }
    else if (cost > Get_Money(ID)) {
        sprintf(message2,"ppage %d Sorry, the Nod Turret $600",ID);
```

```
Console_Input(message2);
}
else if (Get_Object_Type(obj) == 0) {
sprintf(message2,"ppage %d Test",ID);
Console_Input(message2);
}
}
```

i hope u can explain me whut to do with it >.<

Lee doesn't know C++ so there's no point giving it to him.

What version of scripts.dll do you want it built into and I'll do it for you. I can't do 3.0 or 3.1 at the moment as i only have VS.net. Haven't upgraded yet, but anything before that or SSAOW i can compile into it for you.

Kam, don't capitalize your e-mail address, it'll make it incorrect (unless you're hoping to do that)
He got the script from cdcyborg, but i thought he got it from you, my mistake.

here ya go, i can't test it because i don't have renegade atm. its SSAOW ported to scripts 3.2 with your turret program in it

If you want the sources i will send them to you. i didn't want tp put them in this zip because it would make it messy.

to build a turret you need 600 cred and you need to type "!Build Turret" (case sensitive)

ma fds wont start any more after i installed the stuff u gave me it says cant finde shaders.dll and i trayed to change shaders.sdb into dll but then it says some thing with a path to some where any

ways its not workin and bhs.dll wont load whuts wrong??

Scripts 3.2 ?
remember it's SSAOW, not SSAO

heh, lol... i was in a rush, i was late for school hehe. yes its scripts 3.2, been needing SSAOW in it for the Seye.

and im sorry, i forgot to put shaders.dll in the zip. just unzip, and place all the files in your FDS folder.

[View Forum Message](#) <> [Reply to Message](#)

you need to install direct X. not me this time

http://www.dll-files.com/dllindex/dll-files.shtml?d3dx9_30

put this dll in the same dir as scripts.dll it should work fine then.

i have the same problem with scripts3.2_SSAOW_turrets

the server keeps restarting? how do i fixed that?
