I don't see how you are going to get custom model textures to work if you don't want to have to add anything...

You can get good model textures below:

www.cncden.com
www.cnc-source.com
www.planetcnc.com
www.cncseries.com

I'm sure there are many other places as well.

USE THE FUCKING SPELL CHECK YOU ILLITERATE FOOL

SKISN- http://www1.1001skins.com/messageboard.html?post_id=11&reply_id=55&post_view=threaded

CHANCE- change

DELETEING- deleting

ADDIGN- adding

ANDYTHING- something that Andy has.

You wonder why folk take the piss out of you? 5 spelling mistakes in 2 1/2 lines.

The boy needs help for "Dislexia".

hye ebing ilitrete si colo! /sarcasm

You know, picking on someone for there spelling is sad..Seriously, Just because he can't spell is no reason to treat him like some piece of shit, Or calling him names for that matter.

And if he has Dyslexia you're more of a idiot than I thought for picking on him for something that ISN'T his fault.

Also, Some more skins =
http://www.distortiagaming.com/index.php?categoryid=10&p13_sectionid=2

Go nuts.

Btw puddle, You should use the spell check some time. It's Dyslexia.

I could pull an Aircraftkiller here and post a picture of a bear skin.

If you don't want to read his poor grammar, then don't. Either that or use the ignore feature.

Not to contribute to this, but just for my amusement, can you please write one post that is typed up nicely?

As for the actual topic, try the links Dave showed you. I'm sure one of those has what you're looking for.

I have just complimented Tanner on a new post that he has made. He has been actively encouraged to keep up the good work.

So you see, I am not averse to giving credit where it is due.

Beanyhead wrote on Tue, 16 January 2007 03:55I could pull an Aircraftkiller here and post a picture of a bear skin.

Same here, but I couldn't find a picture of it...I swear that I saw one before...

I tried my best to translate this...
Does anyone knows where can I get a skin that only turns Nod's team color into blue (not changing anything else) without removing or adding any files?

But it still doesn't make sense.

So the answer is: It's impossible to change skins without adding files (into the data folder). Case closed, kthx.

or if u have photoshop with the proper upgrade so u can edit dds files, just use the paintbucket and turn all the red to blue, that way u dont have to share em with anyone
