When I am typing in the cereal number on the back of the CD case it wont work rite...

EX:

(Not my cereal number) "-" represents a space and "[]" represents where you put the numbers in
(no I don't type in the "-")

[1234]-[1234567]-[1234567]-[1234]

The numbers in red it wont let me put them in, it goes to the next box when I try to type them in...
So than it tells me the cereal in invalid. It only lets me put in 6 numbers where I need 7!?

WHAT DO I DO!

[EDIT]

OH MY FUCKING GOD... Ok here is my story.

I went to find my data disk because I noticed I didnt have it, so I find the data disk. It is in the renegade CD case. The case I was getting the cereal off of is a Medal of Honor: Allied Assault CD case it had renegade disk 1 in it. THE BACK OF IT WITH THE CODE ON IT SAYS FUCKING RENEGADE I COULDNT TELL! So now this topic is pointless. So I got my cereal and can install it now, lol!

I was just going to suggest trying your serial number instead.
