Windows?

Let me find mine, hold on...

found three of them () so uploaded them all (size difference)

Try starting Game2.exe if you use RenGuard.

From the SS, it's WWconfig.exe that's bugging up. Not using Render9's WWconfig.exe with Jonwil's scripts are you?

tried Game2.exe and i tried using the scripts.dll that came with it and scripts.dll that jonwil made.

i dunno what render9's wwconfig.exe even is
