As the topic suggests, Control and acelarate radio commands won't work, but using just ctrl or alt radio commands sepratily works. Weird.

I ignored it for awhile, but now it costin me games, please help

Sounds like an issue with your keyboard. Did you try using the ctrl on one side with the alt on the other side and see if that works?

Ah, you have to go into the BIOS and change the amount of keys it allows to be pressed at the same time. I'm not sure of where it is exactly, but that's where it is.
