These are two problems I have been having since I reinstalled everything.

1. Go to edit Level Settings in level edit, and it crashes. This happens in both the EA version and johnwil's version.
 2. AI bots won't spawn, specifically soldiers, if I place the soldier directly or use a spawner, they just don't show up when I load the map to test it. Vehicles work fine however... I can't figure out whats wrong, I have tried temping them even...

Well for the first one disable visual themes for leveledit.exe

The second one I'm sure i could figure out, just send me something i can look at.

Yay, fixed that annoying crash.

As for sending something.. I'm not really sure what to send. I'm not doing anything special, as far as I remember all you had to do was click the soldier/spawner and then click "make"

I have looked at the tutorials, and they haven't told me anything I didn't already do. Its like I'm missing something all together.

If there is something specifically you want to see, let me know

<http://www.renhelp.net/index.php?mod=Tutorials&action=view&id=13>

My tutorial there will explain everything for bot setup.

EDIT: I thought you were already following the steps, no need to send anything.

Yes, that process I am aware of, I have done that, and they don't show up when I load the map.

i also have a problem like this, the multiplayer powerups EG: MP_Weapon_LaserRifle_Spawner doesn't show up at all ingame :/

i tried the tutorial on renhelp. and it makes the server crash. now i gotter redo the map :/

Oh this is not serverside, this is standard renegade mapping/modding.

Under the spawner settings for the bot only these two options must be checked (turned on):

TeleportFirstSpawn
ApplySpawnMaterialEffect

i can its easy all you do is go to spawner->object spwaners and temp the "Object Spwaners" heres a picture to show what i mean

<http://img154.imageshack.us/img154/334/spawnerig4.png>
then just add the soldier you want done!!!this works for me perfectly

if you look, it makes the server crash. nvm anyway. all i had to do was copy the ddb over as well.
thanks for telling me.
