Do a quicksave right after he disappears, then reload that quicksave. He should now reappear and be able to finish the mission. However, if you want to get General ranking on it for some reason (which requires 0 reloads), just switch back to the original Westwood scripts.dll for this mission, and then switch it back to the newer version afterward.

P.S. By the way, what version of scripts.dll are you using? I brought this problem up with jonwil some time ago (vids, woo), so I'm wondering why this still hasn't been fixed.

AT LAST! Someone else has this problem, I always figured something was wrong with my install.
lol

EDIT: For jonwil, it worked for any version (at lest) prior to, and including (I think) 2.9.2
