Downloading soon when i get to the front of the line. I'll see if i can get the map hosted on our
clans infantry server if possible so we can play it. I'd say that we could also host the map but as
our site and all our servers are run on the same connection it may cause lag on the servers.
Anyway from the look of it so far it should be a fun map Good Job

Nice map - I've added it to the list of maps on our upcoming custom map server P.S. In the readme, it should be "wrath", not "wraith"

It is called C&C_CTF_HighNoonIm not sure if I will stick with HighNoon as the name but its a pretty sick wild west town map that looks pretty promising right now. Look forward to that. So next release from me will be that, a CNC mode map or my special "Infiltration mode" map set around a Area 51 type situation.

It almost exactly like it all you need are spotlights on the towers and a gun in the riceboat. then you get a havoc. run around get every gun and kill everything and its rambo. which is just great.

heh, IMHO the things in that map are excellent design. the Towers, The Riceboat, The waterfall cave, the river bends.....If Renegade would allow it I could have made it look sooo beautiful. but I had to skimp on things to keep it running smooth in MP.Also, I went back and remade all the grasy areas. Took me 2-3 hours to get it just right though. It was supremely ugly before I did so.Later on if there is enough want for it I will make it a CTF or CNC mode map.
