When I load Renegade and I alt+tab out, and I want to return to Renegade, my client crashes and only renguard keeps running...Any fix for this?

ADD:
I have this problem since I've installed Scripts 3.1

That is a known scripts bug. Nothing to do with RG.

RG is the only thing that keeps running after the crash and renguard controls the game.exe and game2.exe files. Also renguard throws me out of some servers sometimes. Just when I'm playing renguard disconnects me and makes a CTD crash (Crash To Desktop)

The bug was solved for me with the latest scripts version (3.1.4) but donno if it's solved for everyone.
