Page failed to load or is invalid.

i see that message when i click on "Manage account" in Renegade.
i just installed renegade and want to make an account and it wont let me.

also, when i try to view the server list, it says "Operation timed out."

someone help please?

Just login with the name you want, and an 8 digit password. If the name is not taken it will be registered to your serial. If it is taken you will not see any servers, so logout again and pick a different name.

Most of the common names are already taken, so try putting numbers at the front or end if you chosen name is taken. Names have to be between about 6 and 9 letters iirc.

Is there an FAQ in a sticky thread about this? If not, someone should make one tbh, and we can just link people to that.
