Hi guys

I have my own FDS that i would like to play on it my self but, When i run the server it works ok and my buddies can connect to it fine but when i try to connect to it my self nothink happens? I cant even connect to any other servers if mine is running,can you host and play of one computer?

Someone PLEASE HELP!

Thanks.

Simply launch Renegade with the +multi switch added to the command line. Don't launch RenGuard though; it does not pass the +multi option properly to Renegade for some odd reason. (Renegade = game2.exe if you have RenGuard installed; I just use the Run box in the Start menu to launch game2.exe)

You can just launch Renegade and get into the Advanced Game Listings section before you launch the FDS and any bots that you use.

I always seem to be the one to post the easy solution on this

Replace your Server.dat with this one: <http://www.blackintel.org/files/blackintel.server.dat.zip>

EDIT: Sorry to be picky but wrong section this should be in the Win32 FDS Section.

Thanks for bumping a 1-year old topic.

~Zack
