I just joined Jelly-Server Mappack and I got this:

I don't have any hacks or whatever and I'm using the Renguard Beta, what's wrong?

I got booted from Jelly about 9 times in a row for it in a few minutes before I just gave up on the new beta. :\

i guess there are just some small bugs / false positives regarding radarhack on this new beta which need to be fixed since radarhack detection is new and not _that_ trivial!

just be patient and wait for the final release. im pretty sure this detection method is the right way to go!
