Probably because you got a ATI graphics card.

By 'does not work', do you mean it wont login, it crashes the game, your computer explodes, a cruise missile is launched at your house....

If you want help with this your going to have to actually give some more details about what EXACTLY it is thats not working, what you have already tried to fix it etc..

Check the MOTD. You probably mistyped your password.

Perhaps you have the wrong password saved...

In the MOTD screen it would, but he still has not posted what the MOTD says. With XWIS a wrong password looks like you logged in OK, but it shows no servers.

Ah, I didn't know that. I've never gotten a wrong password since XWIS replaced WOL...

Xwis is the replacement of WOL but u can't see that. A MOTD is a message of the day.
