does anyone have any solution to making the servers in WOL show the actual amount of players in the server, mine always shows like 4 or five off, and it never says noobstories is full which it is

There's a refresh button that refreshes the listings, and it will tell the number of players when you refreshed.

No, I think he is talking about the gamespy players, which are not included in the playercount in the WOL serverlist. All you could do is to make a programm display the real player count in the wol name, I don't think there would be any other way.
