Ok tho I know most of you guys dont even like snowmobiles but if u like cool paint jobs check this out. I took my exhaust pipes and can off my snowmobile which is 3 pipes and an aftermarket can I just started painting today. But seeing as its an arctic cat I first laid down a deep dark black duplicolor 1500 degree paint base layer. Did 2 coats of that so far. Next thing im doing is cutting out my arctic cat logo and taping it onto the black paint, Spraying over with a silver, chrome-looking duplicolor 1500 degree paint. Heres wats going to be imprinted onto the exhaust can and pipes.

Well, this is a video game forum, most of the the people here are intrested in video games, c&c, computers, and most importantly renegade! I dont bother you guys with my jeep shizit, I save that for jeep forums, I would sugges bringing your pictures and ideas to a snowmobile forum or something.

BTW: No offence was meant by this post.

I am active in about 4 snowmobile forums . Not really made for just snowmobiles but more or less painting in general.
