OK heres mine problem, yesterday my RG updated and was crahing game like a hell, doesnt matter that i lost about 3 vehs in most appreciated moments but the problem is that i cant even run rg now. Today rg updated once again, since this time it doesnt work, no windows nothing, just lioding mouse icon. I decided to uninstall my rg, then i downloaded 1.0322. heres the error which pops out during the instalation

i really dont know what to do to make it work so please help me. of course every file is in right place, old rg installer works fine.

Is the file running? Try killing all game.exe instances using proccess explorer.

It must be in use somehow or maybe read only, otherwise the installer would not crash.

Is it Win Vista? If yes, are you running RG in admin mode?

Someone with a similiar problem (game.exe not showing up) told me that restarting his system solved his issue. Try that - if thats not working, join our support chat.

had a problem updating to 1.0322
after it downloaded the update.exe
i couldnt launch rg
several attempts resulted in several game.exe running in task manager

after a simple reboot of my system and restart of renguard it updated fine
