Hello together.

Some time ago, someone suggested to remove player names from hostile soldiers. Since I was unable to find the related thread, I ask you to discuss this suggestion. I plan this change as a server-side feature of my mod.

Greetings,  
Marc

That takes a bit of the fun out of it for regulars who get into silly revenge fights - \*memories\*

If you do add it, cos it makes it more realistic, make it optional, that's my advice.

Basically, it would change the client to only display the names of people on your side ingame.
