

## BUILD YOUR OWN BOT!

Hello All,

A new fun-based map for C&C Renegade is well on its way to being completed soon. However, its missing the most important things... The Robots!

As you can tell from the subject of this thread you've probably gathered what this is all about.

This map will be released in different versions. The first version will be released in time for the next 3 Hour AOW presented by Warrior Nation and will just have robots(GDI) vs robots(Nod) style gameplay.

Versions after this will have pretty much the same format, however with more Arena features, bots, house robots & theme.

Who can take part in this?

ANYBODY! You don't need 3D Design skills, though it does help.

You can submit your robot design in what ever format you feel is best for you:

- 3DS Max model
- GMax Model
- A hand-drawn concept.
- A 2D Graphic Design Tool Software (submit as JPG, GIF or PNG).

### Design

All submitted robots must have the following characteristics:

Weaponary (Maximum of 2):

- Saw
- Chain Saw
- Flame (limited ammo)
- Spikes
- Axe
- Hammer
- Spinning Disc
- Mace
- Drill

Please note robots with a Flipper or Crushing Razor will not be in the first version, but can still be submitted.

### Body

- Wedge (though cannot be driven onto like a ramp, yet)
- Box
- Cone
- Other (If it looks good, its fine)

### Style

Must be stylish as possible from looking really silly (comic-ful) to looking really mean and tough!

Armour (This is a perfect balance of strength + speed. Materials probably not accurate to the S/S numbers, reference only.)

This is scored on a scale between 1 - 10.

10 = Strongest/Fastest

1 = Weakest/Slowest

- Plastic (Strength(1), Speed(10))
- Wood (Strength(3), Speed( 8 ))
- Aluminium (Strength(4), Speed(7))
- Carbon Fibre (Strength(5), Speed(6))
- Copper (Strength(6), Speed(5))
- Stainless Steel (Strength( 8 ), Speed(3))
- Titanium (Strength(10), Speed(1))

Wheels

- Standard Rubber Wheels (2 or 4 or 6)
- Tracks
- Legs/Feet

Name

You can name it any thing you like, so long as it doesn't contain swearing or sexual references (Its a bitch ain't it?)

The bot and designer will be credited in the Readme.

References:

The following links contain references to existing robots made by other people. They are only to be used as ideas for your own and not to be totally copied as they may have copyright against them.

- [http://www.battlebots.com/meet\\_the\\_robots3/meet\\_search.asp?p=0](http://www.battlebots.com/meet_the_robots3/meet_search.asp?p=0)
- [http://www.robotwars.ecs.soton.ac.uk/file/house\\_robots.html](http://www.robotwars.ecs.soton.ac.uk/file/house_robots.html)

- <http://www.teamtornado.co.uk/gallery.htm>
- <http://www.robotcombat.com/therobots.html>

Submission Format:

Robot Name:

Designer:

Armour:

Wheels (type and total):

Weaponary:-

(1)

(2)

Link to 3D Model / Screenshots / Concept:

If you create yours in max/gmax, you may add the wheel bones to it and test it ingame, however on submission I do not require the LevelEdit settings, just the model.

Don't think theres anything else to say except for, HAPPY DESIGNING!

Oh, and if you're wondering what the Arena looks like, take a look at this video I did about a month ago:

<http://www.youtube.com/watch?v=bH0DbzpEWpo>

Good Luck,

Andy / WNxCABAL.

For those of you doing this, i created this saw blade for everyone to use. Anyone can use it, i don't need any credit.

It's available in .max and .3ds so can import it into gmax as well.

Heres a pic

Sorry about the upload, you have to enter the 3 digit code at the bottom then wait like 60 seconds then you can dl.

In with the First Entry!

Robot Name: Teapunk  
Designer: One Winged Angel  
Armour: Copper  
Wheels (type and total): Tracks, 2  
Weaponary:-  
(1)Front mounted Axe  
(2)Rear mounted spikes (the back is supposed to come down like an axe too)  
Link to 3D Model / Screenshots / Concept:

PM me for the model.

Yeah. I'm waiting for kamuix's forum to get fixed before I release it. It's been done for about a week.

If I make a concept sketch of this bot idea I've got (Well, I'll make it in Unreal and do a fly-around video of it, but I can't get it out of Unreal and into Max) would someone make it in max for me? (This won't take long...)

[View Forum Message](#) <> [Reply to Message](#)

---

In with Entry #3!

Robot Name: Walking Destruction (Yeah, that can get changed...)  
Designer: CarrierII (Needs a manufacturer...)  
Armour: Stainless Steel  
Wheels (type and total): Legs, Four (4) Feet  
Weaponary:-  
(1) Thrustable Spike (Goes forwards, can be aimed)  
(2) Saw Blade (Goes down when fired, can't be aimed)  
Link to 3D Model / Screenshots / Concept:

I threw this together in Unreal, but I can't use 3DS Max to save my life, so if someone could reproduce it, that would rock, if you need wireframe screenshots or anything, I'll make them for you

A 5.41 MB Concept Video

Enjoy!

Edit - I can't count... 2 entries before mine makes this the third...

---

---

[View Forum Message](#) <> [Reply to Message](#)

---

How long did that take you exactly?

Plus, if you could post the wireframes and any textures used.

---

---

Subject: Re: C&C Robot Wars: Build Your Own Bot!  
Posted by [CarrierII](#) on Tue, 15 May 2007 14:22:39 GMT  
[View Forum Message](#) <> [Reply to Message](#)

---

Wireframes comming up, errr, that took me about 50 minutes... (yes, the construction's of awful quality, it's only a concept) why do you ask?

Those textures were meant to be placeholders because the default texture in Unreal sucks, I'd use something nicer, but I'll get them out anyway.

Attached.

Those textures were meant to be placeholders because the default texture in Unreal sucks, I'd use something nicer, but I'll get them out anyway.

Carrier, I appreciate the effort and time you have took to create this, but in all honesty I really cannot get my head around how basic it looks. Now I know you said its only a concept, but if you're going to do a 3D model, at least do it well rather than stacking a load of cylinders and cubes on top of each other.

I don't mean any disrespect, but maybe you could draw the idea you had?, you'd be suprised how much better the end result could be!

Bluethen: It all depends on the server setup. If Friendly fire is off its team vs team, on its all for one, one for all!

Jerad Grey: Why don't you show us what you got?

Blazea58: Thats a lovely piece of 3D there! That poly count is fine, The map can afford to have slightly higher (not that they need to be) polygons for vehicles/bots due to the low poly count of the terrain.

Any chance you can send me that model in a PM? Thx!

All:

Keep em coming! And...

Check this out

I was bored and browsing websites when i saw the concept TruYuri drew up on the APB forums. I figured i would have a go at trying his concept, though it is far from exact but has alot of the same features. Not sure how this would work ingame, would probably need a few pivoting parts that would have animations attached for arm peices.

Name: Apoctek  
Designer: TruYuri  
Armour: Stainless Steel  
Wheels: Tracks (2)

Xpert wrote on Mon, 27 October 2008 20:05: Figures... Great projects get abandoned so fast.

That's because not many people actually offer to help, I myself have had first hand experience with that.

I am blessed that I have a team now, and as quickly as it came.

lol, personal life just took priority that's all. Didn't have time for it anymore.

Plus as N1warhead says, not many people were not all rushing at once to help.

Blazea58 wrote on Tue, 29 May 2007 10:05: I was bored and browsing websites when i saw the concept TruYuri drew up on the APB forums. I figured i would have a go at trying his concept, though it is far from exact but has alot of the same features. Not sure how this would work ingame, would probably need a few pivoting parts that would have animations attached for arm peices.

Name: Apoctek  
Designer: TruYuri  
Armour: Stainless Steel  
Wheels: Tracks (2)

Nearly a year-bump but holy shit, I was never notified that this was modelled out.

keep em coming is this mod going to be server compatible ?? and when you do release it can we also have the option of scripting things into the mod ??

please reply "NestGeneral"

I would love to see a remake of Razor from the original Robot Wars.

I know.

---

But I still want to see it.
