xcc mixer crashes when i get to skirmish00.mix  
if its removed, it crashes on startup  
ren keeps having probs with bhs.dll. have tried the one in 292 and 313. still have the problem. can someone point me to the link so i can try re-downloading them  
any help?  
it didn't work when i installed legos.pkg, so i installed bhs.dll and scripts from 313. had the problem. reinstalled ren from scratch, tried 292 and 313, still same error messages on startup.
