i couldnt dowload renguard with the auto-uptader that uptades atomaticly when u start renguard so i dowloaded but i have gotten errors after errors.....first when i installed it it was writed :problem with opening renegade.exe map. So i putted in the patch map i found in the renegade map. Then when i installed it i putted on renguard and i was have to restart. when i restarted i got amesseage just when i putted on the computer it was writing: couldnt install file mss32.dll then i searched on renguard in my computer it was a file that the name was renguard patcher when i puuted it on renguard camed and i pressed to play renegade but when i logged in with my account there were no servers at all and i couldnt find a end in this error stuff so i just gaved up and ask u guys i hope u got a answer or im in a BAD situation
srry to bother u with this amount of letters

You can upgrade yourself by hand by downloading
http://www.renguard.com/_auto_update/game.exe and replacing the game.exe currently in your Renegade directory.
