I had a bad install. The scripts themselves work fine, but whenever I close out of Ren I get a lovely "this application preformed an illegal operation and had to be shut down" box. Is there an uninstaller or do I have to remove the files by hand? If so, what files do I remove?

I believe you can just delete scripts.dll and rename scripts2.dll to scripts.dll.

Don't forget to delete the d3d8.dll when removing scripts.
