Errrrmm

The full game has been out for... 5 years now? it costs about \$5 US, so it'll be cheap, check your local version of [www.amazon.com](http://www.amazon.com) or similar, you'll find the full version there. Very worth it.

I have the full version, but i can't play online because it is a cracked version. While i was searching for servers on the net i read that i can play online with the multiplayer demo.gamespy is too complicated.

I do hate to be annoying, please just buy it.

Oh, and this forum doesn't look kindly at "cracked" software.

Like any other EA game, There servers suck so usually serial gens work.

Since XWIS now host the servers, There serial checker actually works, And you can't play on-line due to "Invalid Serial".

I suggest buying it, It's cheap, Too cheap, I don't see why it isn't free. D:

I bought it used when it came out, it costed me 10 bucks Canadian over 5 years ago. Not a single scratch or anything, too.

Best 10 bucks I've ever spent if you ask me.

To see everything clear, i want to say that i'm not a tramp to buy the original. If everything works good and i can find a store, i will buy it this week.- almost forgot it. I have a question about the original game: are there any available internet rooms or i have to use Gamespy?

Just follow this guide Installing]here when you install, and you'll be fine.

Yes, there is a free internet service available.

That would require effort!

As to topic starter: I don't understand why someone would run a serevr for a demo of a 5 years old game.

Core patch 2 includes a no-cd patch.

Check here for an install guide:
