Right click on your Renegade shortcut, go to properties, and add the "+multi" options to the end of your shortcut target, so it looks like:

"C:\Westwood\Renegade\game.exe" +multi

(I think that's right..., either that, or load Renegade first, and then Alt-tab out, and load the server)

that worked thanks very much now i will not be mad at it

i have a question maybe it is stupid to u
but do u know any other things like that to do like +multi
page me if i know and tell what they mean
thaks

<http://www.blackintel.org/?page=projects/downloads>

Download the "Start button fix"
(If not that one then just download one below it)
Or the one below "BlackIntel server.dat" which also has it and a few other things.

\\\"C:\\\\Westwood\\\\Renegade\\\\game.exe\\\" +multi

Woah I never heard of that... Does that really work? Ive always had to open my renegade first & then my server :S

Eh wait, whats with the double backslashes? \\\"\\\"

Wouldnt it be

\"C:\\Westwood\\Renegade\\game.exe\" +multi

??

There are no double backslashes, I blame your browser for a lame interpretation of

\"C:\\westwood\\Renegade\\game.exe\" +multi
