i'm trying to save a file as .dds in paint shop pro 7 and i can't seem to get the save button to "light up" so that i can click on it. i clicked on no alpha (dxt1) under save format and i checked on emulate xbox (dxt1) on formats to preview (override) but i still can't get it to work. any help would be greatly appreciated :)

Your Image MUST be a perfect square with the ratio 1:1 !!! Or it will not work.(e.g. 234x234 will work but 234x235 NOT!)If you try to save a file in the wrong format you must restart PSP to amke it work again.

To be valid it must be DXT1/DXT5 with texel counts int powers of 2. For instance:2x24x48x816x16128x128256~512~ etc.I think 128x256 types are fine too, but I'm not sure.
