Turn off the attitude, man, and turn off the CAPS LOCK. You go to the side (GDI or NOD)find you vehicle or click TMEP or MODIFY and then there are your settings.

I assume you are trying to assrape jonwil's version of leveledit. It won't run by itself. You will need to install the mod tools first. I can't be bothered to give a fuck like you the direct link. Happy searching, it will take a sane person around 30 seconds.
