Hi,

I'm been trying to play C&C Renegade on Windows Vista (I have never played it before) from the C&C The First Decade CD.

I have downloaded and installed the "The First Decade" patch 1.02 which applies a registry fix patch for Renegade.

Everytime I start Renegade from the "C&C The First Decade" menu, an error appears:

This is what the error details state when I click "view problem details":

Do you use a no-CD crack?

If no, does the crash occur with a no-CD crack, too?

No, I do not use a no-CD crack.

Anyways, I got it working by running the game in Windows XP compatibility mode. So I'm fine for now (at least I think so).
