your mod team to make their own models... If you guys can actually do that without using something from Renegade. *cough* *mediumtank* *cough**cough*That tank didn't go into Renegade*cough*1. It still was Westwood's2. It has more resemblance to the Renegade medium tank than the RA1 medium tank which is an M1A2

that picture is way too low quality to get anything from it...Didn't it say the ra1 medium tank fired 105mm shells? If it did it would be the m1a1 (or the m1), not the m1a2...

It has more resemblance to the Renegade medium tank than the RA1 medium tank which is an M1A2No, it would be the M1A1 or equivilant. The A2 came out in the mid-nineties and has a recognizable cylinder on the left side of the turret, the CITV (Commander's Independent Thermal Viewer) and some more electronic equipment, along with upgraded ordnance like STAFF shells, improved HEAT shells, MPAT shells, and the normal sabot shells.The M1A1 did not have most of the improvements that the A2 did. It had the HEAT and sabot rounds, but nothing else besides the machine guns and improved armor.The Renegade Alert tank is this:
http://www.cncrenegade.info/redalertmod/images/models/vehicles/MTank_Render.jpgThat never made it into Renegade. It was made by a friend of mine in Westwood... It wasn't made totally by them. He also made the r4ped version of the tank which is present in Renegade today.

I still think an M1 would look better in the mod.
