I never had a problem with renguard until now.

The latest version is horrible. It won't let me run fraps, it just crashes the game and says it's unauthorized when I hit F9 to record. Sometimes when it crashes, it makes my system so slow that I have no choice but to hit the reset button since I can't do anything without waiting 5 minutes for it to do something.

THEN! It keeps disconnecting from the renguard servers and kicking me out of the game.

What is going on?? Renguard used to be great, now it's completely ruining gameplay.
