i have seen these guns that are base defenses or that u can control and i know gdi and nod have this one its like a big gun type base ddefences while one shoots like an apc gun does the other shoots like a tank what are those presents if u need ss of them just ask and ill try to get them

another is like a another base defense that shoots like an mrl and another is like a smaller gun that shoots lot of bullets what are they?

ya well the two guns gdi and nod have them and the samsite idk lol and the other one i think only nod has i seen on that kamuix server
and no its not one of the things he made himself

PS i been on this serv and it has these walls now where are theses iv been looking for something like this

lol. Looks like you've been to Kamuix's server.

They are in the tiles > DSAPO > DSAPO_cnc > dsp_CnC_Wall
