Didnt happen to me.Only Real mistake he made is you have to kill the harvesters once for them to
work right in multiplayer.Which sucks but its typical to find mistakes in his maps so who cares I
guess.Not like anyone plays Gobi online.Or at least not that Ive seen.

Yeah i had that problem too (about the harvesters not moving until you kill them), but it doesn't
occur always. It is a bug that could do with fixing. I'm not sure if it occurs in WOL mode, but all the
servers i played that had the bug were in GSA mode. Saying that i didn't actually play it on any
WOL servers, but it could still happen there. [February 06, 2003, 10:26: Message edited by:

It works fine for me. Maybe the supposed mistake is on your end, ever think of that?The Pits is running most of my maps in their rotation. Guess what? Most of my maps are played, usually to the maximum of 36 players in the server.But you didn't see that...
