NightRegulator BETA 7 has been released!

New features include: Rec Ladder, Game_info + player_info reporting, as well as a security bug and updated RG code to allow people to reconnect without game interuptions.

New commands include:

!nick - Searches the IP database for a certain nickname
!ipage - Ignores pages from the user
!unipage - removes players from the list
!rstats - takes recs and medals from one player and gives to another - useful if a player changes their ingame handle
!addrec - gives a certain player x ammount of recs
!delrec - takes away x ammount of recs from a certain player
!suspect - Marks the player as a suspected cheater and places them in a special anti-cheat mode (BIATCH feature)
!trust - Removes the effect of the !untrust command
!istrust - Returns whether the player is trusted or not

Is your ip database local or remote? You may want to include a function/plugin which connects to brenbot's ipbot so we can share this info?

it is local

however i am adding the IPbot database that i was sent awhile ago for BETA 8
