Renguard tried to ban me for a LAN exploit

WTF, I do not even know what a LAN exploit is never mind how to do it?

Can someone shed some light on what it is

P.S

I logged onto renguard, went on renegade, clicked on server BCSERV 5 and got thrown off the whole on renegade. Could this linked to the fact that my renegade keeps closing due to soething like

"Unauthorized action occured, terminating renedage"

Because that is something like the message I get every time I log into renegade first time, I have to re-start every time.

The LAN exploit detection sometimes is wrong, so nothing to panic about.

OKAY, STUPID RENGUARD HAS ANOTHER PROBLEM

Flawless as it usually is...

I was playing on the same server as I was earlier BCServ 5 on WOL, when it said "disconnected"

from renguard server", my renegade closed. And now I cannot join renguard, I just keep getting.

"Cannot connect, perhaps your firewall is incompatible with renguard"

So i turned it of and it still won't work.

.....
Can anyone shed some light on this incident?

Turned your firewall on?
