It says to uninstall Ressurrection just change the ressurrection.dll to resurrection.unused. So, I did this for my server because I have a feeling its the reason why my ladders aren't working Anyhoo, when I do change it and try to load up my server, my server doesn't appear in the advanced game listings, anybody know why?

Remove/rename the data/armor.ini.

Which ladder doesn't work?

The climbing ones and the only possible reason I could think of them not working was RR. I had them working at one point, when i first had my server up, then they just stopped working.

Could you send me the software for that?

How does the ladder work? Scripts? SSGM? BR?

Umm.. I'm not 100% sure its RR yet. But I'm using NR, SSGM, and when you get on a ladder you just get stuck on it and you can't move up or down.

The problem will be fixed in next RR release.  
Thanks for not reporting it

So it WAS RR. Wipee! I found the problemo! Also, YRR, when the game is on pause you can still end the game with an endgame beacon. So you might also want to fix that.

I'll add this to ToDo for later releases. I have other things for RR to think about

Thanks YRR  
When's the next release planned for?
