Well, you aren't being so supportive of renegade yourself with having WAREZ renegade versions on your website. Also, you have cheats on your site, like the clearscope one.

Another thing is that you hinder the banning of cheaters by giving out serialgenerators for renegade, and a shitload more of EA games.

Also, you generally post like an complete idiot.

Supporting warez version of renegade kills the game? Um, are you unaware that by more people downloading legal (illegal in the us) or w/e copies of renegade, does it increase or decrease the amount of players that we get? Exactly. I told people I knew to install an .iso version of the game a while back, with cracked serials, and they played on GSA, then xwis came along, and I got a working keygen, now they use that and play online. and these dont cheat, i know em personally, versus people like bbfcheeky who bought it legitly probably and fucked it over by cheating, which would you prefer?

Your the person that resist things, correct?

Says so on your profile

Maybe you can resist what you see that is offending? If you see someone offending others twice, then you might as well report that (First one and Second one) but if someone does it once, why not forgive the guy?

Depends on how offending it is.

Still, if things were that rude then sure you can report it but wasting peoples time just for one comment is another

I'm not sure I understand.

trooprnm has a public download of a (so I'm told) working key generator which can easily be used by people to get around network bans by XWIS. Also, I remember seeing somewhere that he shares serials or something. Therefore, I feel it is my duty to tell the XWIS admins, and hopefully get the offending serials banned from the network.

have you tryed my mod? ITS WORKS SERVERSIDE ONLY, if oyu just put the objects.ddb in your data folder,

- 1)servers dont show up
- 2)the mod will do nothing, it has to be SERVER SIDE

But ofcourse you wouldn't know that BECAUSE you didnt take the time to test it for yourself.

So its not a cheat that can be used online, AT ALL. And bluethens? Im shocked at your lack of

knowledge about this game sometimes..

Clearscope? a cheat? its a skin, and yes it does give you an advnatge and I dont support it but SOOOO many people use it its redictulous, the most popu;ar rene skin 100%, if you didnt know.

Have you even read what i said, i know its client side, my point was that you are accusing bluethen who also made a SP only cheat.

And if you don't support clear scope then don't put it on your fricking website.

Don't try to BS us, if you wouldn't support it you wouldn't have it on your site.

The site is not only for me, other members use it, and it wasnt be who suggested putting it on there, and if your saying I cheat your new to the forums. My "mod" is SERVER side only, NOT client side. therefore it can't be used in MULTlplayer, as for bluethens cheat, he can claim it for SP all he wants, but thats what cyberprick said about final renegade too, but look what happened.

This is ALL beside the point, YOU CANT download a sigle 1 of those files FROM THAT site. fl00d3d was right to a point. BI's shear ignorance after relaseing a few helpful stuff is amazing, if you think you know all, well, im sorry to tell you but its appearent you guys dont much much at all

So the links sya there is maintenance being done? So last time i checked stuff usually comes back up after maintenance...

And btw bluethen hasn't released those cheats and thus those cannot be used by anyone. Oh and btw you didn't make it TD did...

Do I look like "cyber prick" to you? I was actually smart enough to make the mod not work in multiplayer! I can even send it to you and you can try it out.

All you seem to do is complain about me cheating, when I don't. At least it's not as bad as you giving renegade out for free along with a keygen. Layoff for once and get a life. I don't know how many times I have to tell you, but I don't cheat.

Now stfu.

Guys, if someone accused you of cheating, it isn't like your going to be banned from XXC Renegade?

At least if someone can prove that they cheat then they "would" get banned.

XCC Renegade?

WTH is one of those?

If you mean XWIS Renegade there is no such thing. XWIS (XCC WOL IRC Servers) only owns the online servers.

Renegade is owned by Electronic Arts, the bastards that shutdown Westwood and gave "Command and Conquer" a bad name.

oOps, but my whole point was that it really takes prof to ban players that cheats, so if someone accused you that you cheat, it basically doesn't matter.

Will you do it for me?

problem...everytime we get somewhere theres cheaters and bypassers that set us years back, like bluethen (who was actually caught MAKING cheats) and BBFcheeky who was shit even with cheats, and then Public WOL clans think they are good because the "own" the 1day players in there servers, like EKT who play EVEN worse than BBF, and thats an accomplishment

Know do you see why its that hard?

You wanna play me ingame, Sniping?
Ill blow your head off before you even get out of your base,
And Ill use RG, no cheats, and have you pic the map, side, and other crap.

It seems to me that the only thing trooprnm is doing here is slowly making an enemy of every single one of the people on these forums. I'm quite surprised that none of the other people in his crappy clan ever post here!

On a side note, now that users can create polls, someone should create another "Ban trooprnm02?" topic, I think we all know what the poll result would be.

Despite me thinking he is a complete idiot, i don't think he deserves to be banned.

But the way he is going, like you said, getting alot of people hating him, eventually, he'll want to leave when everyone does hate him and flames him in every thread...

he wont HAVE a base. He will probably kill it before he even get a sniper

And if he leaves we got no body else to flame, make fun of, making him lose an argument and making him look like an idiot
