I think me and Stambes are having the same problem...till today afternoon (EST USA), WOL seems to be fine. Now I can't connect.

Is WOL down? I think it is. I hope I get some answers. Thank you.

Now i have a new problem. When ill start RG, come the message:
List of servers could not be determined. Examines they its Internet connection.

Need help?

Hehe, I'm great. (lol)

Right. That message, I'll assume, is his translation of the german for "Unable to initilize network, perhaps your firewall is incompatible with Renguard"

Allow Renguard through any firewall software you might have, and see what happens.

on numpad! I need help!
You want the Core Patch. You can either let RenGuard download it automatically, or get it manually here:  http://www.renegadeforums.com/index.php?t=msg&th=18892&start=0&rid=3 134
