After a long time that i played Renegade my friend told me about rengurd. i tried it and it was very helpfull, but today when i tried to play its tried to connect to serever and faild 3 time and then i got the messege:

"unable to initalize network, pehaps your firewall is uncompatible with RenGuard"

i tried to open port 6500 and also to close my firewall but nothing happend.

after that i tried again and it disconnected me in the middle of hte game this is what happend:

```
[19:56] Trying to connect to server #1...Failed!  
[19:56] Trying to connect to server #2...Connected!  
[19:56] Secure link established.  
[19:56] Welcome to RenGuard, tendo2!  
[19:56] To launch Renegade, please click 'Renegade'.  
[19:57] You have joined n00bless.com all out war.  
[19:58] You have been disconnected from RenGuard, tendo2.
```

plz help me, i don't know what to do.....

have you been banned? Because if you go to a Rg server when you're banned, the server and rengaard will be more then happy to kick you.

Fix: go to a non-rg server and see if that helps. Because you been tring to go on the same server.

i'V BEEN KICKED CUZ IMNOT USING RENGUARD.

Rengurad working good but he disconnecting me after few min if it was because of the kick it was in a few sec not min.

more then that this is not the only server that its disconnecting me auto. its from all the servers like that....

RG tends to dc now and then from its master servers. Most Ren servers' bot has been updated to not kick you for that. However, if you are in the forcerg list (people that need to use RG), it'll kick you when that happens.

Go complain at n00bstories to get you off that list .

you dont understand... the server is let me in when i using RG the problem is the dc from RG.

when RG dc the game shutdown.

ps. i can get in the server with RG as long as he work- the problem is whenhe DC....

The bot shouldn't kick you for the dc, except when u're forcerg'ed. Unless n00bless uses an outdated bot, in which case you might wanna change servers...

Renguard didn't do that.

My renguard does the same thing, it just shuts down on me for no reason. I try to reboot renegade and thus rebooting rg but it dont work. Although i don't get booted for not using rg.

Restarting Renegade doesn't restart RenGuard.

QFT

I have this problem sometimes. I join a server that runs Renguard and all of a sudden, the next thing I see is my desktop and Renguard saying "disconnected from Renguard network"

All I do is just close Renguard, restart it, then start renegade, join the server, and all seems to work fine.

How many times have you retried to enter that server?
